C) Name of the Project – EXIT EMPLOYEE PREDICTION

D) Create the dummy data set

Employee No	Leaves Taken in Last 3 Months	Percentage of work done in Last 3 Months	Productivity in Last 3 Months	Output/Label
101	6	45	33	RESIGN
102	3	89	92	NOT RESIGN
103	8	75	67	MAY BE
104	2	20	30	RESIGN
105	5	90	83	NOT RESIGN

B) Find out the 3-Stages of Problem Identification

Stage 1: Machine Learning / Deep Learning (In case of ML output not satisfied)

Stage 2: Supervised Learning

Stage 3: Classification

A) How will you achieve this in AI?

Using the above strategy we can achieve this in AI.
